## PROFESSIONAL SUMMARY

---

Full Stack Developer with experience building scalable, high-performance web applications using React, TypeScript, and Node.js. Strong in API integration, authentication workflows, state management, and performance optimization within Agile/Scrum environments.

## TECHNICAL SKILLS

---

|                      |                                       |
|----------------------|---------------------------------------|
| Frontend :           | React , Next.js.                      |
| Database:            | MSSql , PostgreSQL, MongoDB.          |
| Backend :            | Node.js(ExpressJS), RESTful API's.    |
| Programming :        | JavaScript, Typescript , C#.          |
| UI libraries :       | Tailwind , ShadCN , Framer Motion.    |
| Tools/Platforms:     | Postman , Git , Figma.                |
| Recently Exploring : | Linux, Docker , AWS , CI/CD , DevOps. |

## WORK EXPERIENCE

---

### **Full Stack Developer**

(Acelucid technologies Pvt. Ltd)

Aug 2024 - Present

- Developed and enhanced scalable frontend features using React, TypeScript, JavaScript (ES6+), and Tailwind CSS in an Agile/Scrum environment, ensuring clean and maintainable UI architecture.
- Built and maintained admin dashboards, data tables, notifications, and role-based interfaces, improving usability, accessibility, and operational efficiency.
- Performed robust API integration with ASP.NET and FastAPI REST services, implementing authentication and authorization flows along with loading and error state handling.
- Implemented efficient client-side state management using Redux Toolkit and Zustand, reducing UI complexity and improving data consistency across modules.
- Applied frontend performance optimization techniques including optimized data fetching, caching, and memoization, reducing unnecessary API calls and improving page performance by up to 50%.

## PROJECTS

---

### **Lapis & Oak** | (React 19, TypeScript, Strapi 5, Zustand, TanStack Query, Razorpay, pdf-lib)

- Built a production-ready e-commerce platform using a headless CMS (Strapi 5) architecture, enabling dynamic content management and scalable frontend delivery.
- Automated Gift Voucher workflows with real-time PDF generation (pdf-lib) and email delivery (Nodemailer), eliminating all manual voucher handling.
- Integrated Razorpay for secure multi-step checkout with server-side price validation and webhook-based order synchronization.
- Managed client state with Zustand for cart persistence and TanStack Query v5 for server-state caching, reducing redundant API calls significantly.
- Deployed the full-stack application on AWS using EC2 for hosting, RDS (PostgreSQL) for managed database, and S3 for asset storage and PDF delivery.
- Project links – [live website](#)

### **Highland** | (React, TypeScript, RTK Query, ReduxToolkit)

- Developed and maintained scalable user interfaces for an enterprise-grade application.
- Implemented complex admin data tables with filtering, pagination, and role-based access.
- Integrated ASP.NET REST APIs for notifications, reporting, and user resolution workflows.
- Collaborated closely with backend and product teams to deliver features aligned with business requirements and sprint goals.
- Project links – [live website](#)

### **Truens** | (JavaScript, React)

- Integrated REST APIs to support detection of fake AI-generated images and videos.
- Collaborated closely with UI/UX designers and backend teams to ensure smooth feature integration and application flow.

### **Mind Mentor** | (Typescript, React, Zustand, TanStack Query)

- Developed interactive and responsive dashboard features for a learning and assessment platform.
- Integrated FastAPI-based REST APIs using TanStack Query to enable efficient server-state management and caching.
- Optimized data fetching and background revalidation, reducing redundant API calls and improving dashboard performance.

### **Time Wise** | (Next.js, NodeJs, TypeORM, PostgreSQL)

- Developed a full-stack timesheet management application for user employees and team leads for tracking and reporting daily tasks.
- Project link – [github](#)

## **OTHER-PROJECTS**

---

### **Personal Portfolio** | (React, JavaScript, TailwindCSS)

- Designed and developed a responsive personal portfolio to showcase projects, skills, and experience with a clean, modern UI and reusable components.
- Project link – [live site](#) | [github](#)

### **Second Brain** | (Next.js, Typescript, Node.js, MongoDB, PrismaORM)

- Building a personal knowledge management application that allows users to authenticate and store curated links (Twitter, YouTube) and notes as a centralized “Second Brain.”
- Designing scalable data models and APIs to support secure content storage, retrieval, and future extensibility; project currently in active development.
- Project link – [github](#)

## **EDUCATION**

---

Siddaganga Institute of Technology  
Masters in Computer Application | CGPA : 8.13

Tumkur, Karnataka, India  
Feb 2023 - Oct 2024

Global college of IT and Commerce  
Bachelors in Computer Application | Perc: 71%

Hubbli, Karnataka, India  
Jun 2019- Aug 2022
